EDUCATION

University of Illinois Urbana - Champaign August 2021 - May 2025
Bachelor of Science in Statistics GPA: 3.52 / 4.00

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, R, Rust, SAS, SQL

WORK EXPERIENCE

Gail Borden Public Library District - GBPLD September 2025 – Present
Computer Center Assistant

- Deliver high-tier technical support and hardware/software troubleshooting for an average of 50+ patrons daily, resolving complex inquiries regarding device configuration, network connectivity, and application usage
- Use data tools including Desk Tracker, MyPC, and Sierra ILS to systematically log patron interactions and analyze weekly technology usage metrics

Eye Level Learning Center July 2026 – Present
Math Tutor

- Deliver target-driven mathematics instruction to 15+ weekly students, using specialized diagnostic assessments to improve concept mastery rate by 22%
- Review homework diagnostics, systematically documenting learning milestones and session metrics for direct weekly reporting to the Center Director

Mathnasium – The Math Learning Center August 2025 – Present
Math Tutor

- Delivering individualized mathematics instruction to groups of 2-3 students simultaneously, breaking down complex algorithmic and quantitative concepts using prescriptive terminology to increase comprehension scores
- Assessing individual learning rate and progress milestones using digital educational dashboards, tailoring lesson pipelines to improve student foundational test scores

Kumon North America, Inc. August 2025 – August 2026
Center Assistant

- Graded and organized daily advanced quantitative and reading curricula for 40+ concurrent students, provided immediate data-driven performance feedback to accelerate self-learning metrics
- Developed individualized student development strategies based on detailed historical progress tracking, collaborated directly with the Center Director to align student milestones with parents' goals

University of Illinois Urbana-Champaign - UIUC June 2022 – May 2025
Course Assistant

- Managed, evaluated, and provided detailed technical code reviews for 400+ cumulative undergraduate and graduate students using Canvas and Gradescope, ensuring strict compliance with programming and statistical rubrics
- Managed office hours and technical discussion forums for cohorts up to 600 students; provided customized debugging support for complex data science topics including Shiny app architecture, numerical optimization, and predictive modeling

Applied Technologies for Learning in the Arts and Sciences - ATLAS August 2023 – May 2024
AI Research Intern

- Engineered a full-stack web application integrating OpenAI's ChatGPT 3.5 API to dynamically ingest query streams and generate structured summary paragraphs, reducing user search time by 40%
- Fine-tuned localized LLaMA models on 1,000+ synthetic and curated datasets, optimizing hyper-parameters to improve context precision by 25% and minimize hallucination

RESEARCH EXPERIENCE

Blackwell Summer Scholars Program June 2024 – August 2024
Scholar

- Co-authored a predictive housing market study under a Statistics Professor, building exploratory data analysis and feature engineering pipelines in Python and R to model Zillow real estate dynamics
- Engineered feature validation and exploratory data analysis pipelines using R and Python to process large-scale real estate matrices, identifying key covariance structures that impact regional housing valuations
