EDUCATION

University of Illinois Urbana - Champaign
Bachelor of Science in Statistics

August 2021 - May 2025
GPA: 3.52 / 4.00

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, R, Rust, SAS, SQL

WORK EXPERIENCE

Gail Borden Public Library District - GBPLD

September 2025 – Present

Computer Center Assistant

- Deliver high-tier technical support and hardware/software troubleshooting for an average of 50+ patrons daily, resolving complex inquiries regarding device configuration, network connectivity, and application usage
- Use data tools including Desk Tracker, MyPC, and Sierra ILS to systematically log patron interactions and analyze weekly technology usage metrics

Kumon North America, Inc.

August 2025 – Present

Center Assistant

- Grade and organize daily advanced quantitative and reading curricula for 40+ concurrent students, providing immediate data-driven performance feedback to accelerate self-learning metrics
- Develop individualized student development strategies based on detailed historical progress tracking, collaborating directly with the Center Instructor to align student milestones with parents' goals

Mathnasium – The Math Learning Center

August 2025 – June 2026

Math Tutor

- Delivered individualized mathematics instruction to groups of 2-3 students simultaneously, broke down complex algorithmic and quantitative concepts using prescriptive terminology to increase comprehension scores
- Assessed individual learning rate and progress milestones using digital educational dashboards, tailored lesson pipelines to improve student foundational test scores

University of Illinois Urbana-Champaign - UIUC

June 2022 – May 2025

Course Assistant

- Managed, evaluated, and provided detailed technical code reviews for 400+ cumulative undergraduate and graduate students using Canvas and Gradescope, ensuring strict compliance with programming and statistical rubrics
- Managed office hours and technical discussion forums for cohorts up to 600 students; provided customized debugging support for complex data science topics including Shiny app architecture, numerical optimization, and predictive modeling

Applied Technologies for Learning in the Arts and Sciences - ATLAS

August 2023 – May 2024

AI Research Intern

- Developed a full-stack web application leveraging OpenAI's ChatGPT 3.5 API to parse complex queries and dynamically generate 3 high-relevance "spotlight" summary paragraphs per request
- Fine-tuned a localized Large Language Model (LLM) using LLaMA's open-source framework across a pipeline of 1,000+ cleaned real and synthetic datasets; optimized training hyper-parameters to enhance model response accuracy and reduce domain-specific hallucination rates

RESEARCH EXPERIENCE

Illinois Mathematics Lab - IML

January 2025 – May 2025

Member

- Collaborated within an agile 8-member interdisciplinary team (5 undergraduates, 2 graduates) under Professor Igor Mineyev to scale the technical functionality of the ColorTaiko! application
- Optimized browser rendering performance and front-end execution speed by 20% through efficient memory management, and integrated custom multilevel algorithmic designs tied directly to Kaplansky conjectures

Blackwell Summer Scholars Program

June 2024 – August 2024

Scholar

- Co-led a predictive analytics research project with a peer researcher under the guidance of Professor Hyoeun Lee, focusing on scaling the accuracy of Zillow Housing Cost Predictions
- Engineered feature validation and exploratory data analysis pipelines using R and Python to process large-scale real estate matrices, identifying key covariance structures that impact regional housing valuations
